

Fiscal Year 2007

University of San Francisco

**Sponsored Project Activity**  
(Analysis by Academic Unit and Type of Funding)

Submitted by  
The Office of Sponsored Projects  
June 5, 2007

## Notes

These data reflect the number of proposals submitted as well as the number and amount of awards received by the University of San Francisco during the period June 1, 2006 to May 31, 2007 (FY 2007). In reviewing these data please note that:

- Funding reported includes funds awarded for new projects during FY 2007 as well as funds from continuing projects still active during FY 2007.
- Proposals submitted during a fiscal year may be funded during the same fiscal year or in the following fiscal year. Therefore, USF's proposal success rate can only be determined by tracking proposals across multiple fiscal years.
- The total amount of funds awarded for each sponsored project is distributed across project years in the OSP database. If a project year begins within the fiscal year of interest, the amount of funding for that project year is included in fiscal year totals.
- Proposals currently pending may be awarded after 5/31/2007 and still be given a start date within FY 2007. The data related to these projects will be added to fiscal year 2007 totals when available.
- The funding reported as "received" during a fiscal year will not necessarily match the amount of funds actually spent during the fiscal year because many sponsored projects are granted "no cost" time extensions to complete project activities and spend project funds.
