Objective

To advance the profession of nursing through leadership, creativity, advocacy, and promotion of evidence-based practice. To promote clinical excellence and compassionate treatment through education and role modeling of these behaviors in the clinical setting. To continue to enhance my personal knowledge of healthcare through continual study, research, and collaboration with peers.

Education

University of Colorado
Boulder, CO
BA in Philosophy

University of San
Francisco
San Francisco, CA
MSN in Healthcare
Systems Leadership

Experience

August 2024 – Present

Assistant Professor

University of San Francisco School of Nursing and Health Professions

Responsibilities:

Participate in the education of nursing students across the didactic, clinical, skills laboratory and simulation spaces at the bachelorette level. Development and adjustment of curriculum consistent with competency attainment, skills acquisition, deliberative practice, and simulation-based education. Participate in community engagement and service projects consistent with university goals for the advancement of Nursing and other Health Professions.
