General tips
• Use Journal Finder for known items (articles from bibliographies, Google Scholar, etc.)
• Use USF Find Full-text to locate full article in another database
• RefWorks is available to manage citations

Books
• Library Catalog (Ignacio) - Search for print books, ebooks, and DVDs at USF
• Link Plus - Get books and DVDs from other libraries in 4 business days
• Interlibrary Loan (Illiad) - Get hard-to-find books, articles, and dissertations from other libraries in 2-4 weeks

Finding Articles in PsycInfo
• PsycInfo contains a complete index of PsycNet (APA publications), links to full-text in PsycNet
• Limiting to full-text in PsycInfo eliminates links to full-text in PsycNet and other databases
• Use quotations to search terms as a phrase
• Use an asterisk * to find variations of a word
  • Example: adolescen* retrieves adolescent and adolescence
• Use boolean operators (AND OR NOT) to narrow and broaden your search:
  • AND narrows your search to include both terms
  • OR broadens your search to retrieve either term
  • NOT eliminates a term from the search results
• Think of the search boxes as parentheses in algebraic equation
• Search interchangeable terms with OR in the same search box
  • Descriptors (Subject Headings) group topics by an indexed category
• Use Thesaurus to find Descriptors

Retrieves 1st term with either term in the 2nd box
• The Thesaurus helps you identify broader, narrower, and related subject categories

  □ Autism

<table>
<thead>
<tr>
<th>Year Term Introduced</th>
<th>1967</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scope Note</td>
<td>A pervasive developmental disorder diagnosed in early childhood that is characterized by an inability to develop social relationships, impaired language and communication skills, abnormal responses to stimuli, and repetitive patterns of behavior.</td>
</tr>
<tr>
<td>History Note</td>
<td>In August 2005, this term replaced the discontinued terms AUTISTIC CHILDREN and EARLY INFANTILE AUTISM. These terms were removed from all records containing them and replaced with AUTISM.</td>
</tr>
<tr>
